GENERATIONAL WEALTH

The Global Standard for On-chain Real Estate.

Token. Protocol. Data layer. Built to compound across generations.

WHY WE EXIST

Real estate is a $400 trillion asset class running on 1960s infrastructure.

$400T
Global real estate market

90 days
Standard NAV reporting lag

5–10 yr
Forced fund-life cycles

$5M+
Min ticket for institutional RE

Access to institutional-grade real estate is gated — by minimum ticket, by residency, by tax jurisdiction, by paperwork. Fund-life models force exits at the worst moments in cycles. Quarterly NAV reports lag the market by 90 days. The legal layer beneath tokenization wrappers is opaque. Holders bear the risk. Intermediaries capture most of the return.

WHAT CAME BEFORE

The first wave of tokenization left us with investment cemeteries.

WHAT BROKE

- Single-asset tokens with no diversification
- No secondary market depth — effectively illiquid
- Static valuations from infrequent appraisals
- Regulatory ambiguity — failed securities tests
- No institutional-grade governance

WHAT GRES DOES DIFFERENTLY

- Diversified perpetual fund — one share, full portfolio
- Foundation-secured custody of the underlying deeds
- AI-Augmented Valuation — daily NAV, on-chain
- MiCA-aligned from day one — passportable in EU
- Dual-entity governance — custody separated from ops

"Investment cemeteries" is how I describe what the first wave produced. GRES is not an iteration on that — it is a different architecture.

WHAT WE'RE BUILDING

A perpetual real estate fund — on-chain, with institutional-grade architecture.

01

Swiss-style Foundation

100% of property deeds held by an independent Foundation modeled after Swiss law. Not by the protocol treasury. Not by founders.

02

AI-Augmented Valuation

Daily NAV computation via verifiable on-chain comparable analysis. Methodology open. Human governance reviews exceptions.

03

MiCA-Aligned Issuance

Token structure designed for European regulatory compliance from day one. Passportable across 27 EU markets.

04

Perpetual Structure

No fund-life clock. No forced liquidation. Real estate is a 30-year asset class — it needs the right structure.

POSITIONING

Niche by audience — accessible by design.

NICHE — BY MINDSET

The investor who reads. The investor who thinks in decades, not quarters. The investor who values transparency, governance, and physical backing over hype cycles.

Niche is not the same as gated. GRES is for the right reader, found through trust-led channels — not the loudest ones.

ACCESSIBLE — BY DESIGN

Any geography. Any ticket size. Any modern wallet.

Private equity RE: $5M+ minimums.
Whole property (EU/US prime): ~$400K average.
BREIT private REIT: $2,500 minimum, 8.75% fees.

GRES — same asset class, retail ticket, global access.

MARKET

The asset class is enormous.

The digital primitive does not yet exist.

$400T
Global real estate market

$1B
Target AUM, Phase 04+

40+
Target jurisdictions

20+
AI Oracle markets

WHY NOW

- MiCA (EU) — first comprehensive crypto-asset framework, passportable across 27 markets.
- AI Oracles technically feasible — daily NAV replaces quarterly appraisal cycles.
- Tokenization 1.0 has visibly failed — the market knows what does not work.
- Real estate funds remain stuck in 5–10 year structures while modern capital seeks RE exposure.

GOVERNANCE

Two entities. Separated by design.

Swiss-style Foundation custody · For-profit Operator distribution

GRES Foundation

Independent · Modeled after Swiss law · No equity by design

- Holds 100% of property deeds & titles
- Bankruptcy-remote — structurally isolated
- Trustees hold custody governance
- Jurisdictionally neutral by design
- Designed to outlast its creators

GRES Operator

For-profit corporation · Where equity exists

- Technology, distribution, day-to-day ops
- AI Oracle, Builder pipeline, KYC layer
- Generates revenue (fees, carry, spreads)
- Where angels & VCs invest equity
- The entity raising in this round

$GRES — BEYOND A TOKEN

Six functions.
One asset.

01 Store of Value

Curated portfolio of first-tier real estate, held in perpetuity by Foundation custody.

02 Yield & Appreciation

Real estate cash flows distributed transparently on-chain. Income and growth, fewer frictions.

03 Qualified Collateral

Designed as collateral for on-chain credit, structured finance, and DeFi lending markets.

04 Global Development Access

Tokenized participation in deals previously gated to institutional capital. Cross-border.

05 Transaction Protocol

Settlement, registry, fractional transfer, cross-border payment rails — open infrastructure.

06 Data & Finance Platform

APIs and SDKs for Fintechs and PropTechs to build on top of GRES — valuation, mortgage, REITs.

REVENUE MODEL

Six revenue streams.

High-margin. Asset-class scale.

STREAM	RATE / BASIS	PAYMENT
Origination Fees	2.0% on capital raised	Fiat / Stablecoins
Asset Management Fees	1.5% / year on AUM	$GRES (12mo lock-up)
Performance Fees (Carry)	20% (8% hurdle)	$GRES (12mo lock-up)
Trading & Liquidity Fees	0.3% secondary volume	Protocol treasury
Financial Services Spread	Variable NIM	Protocol treasury
Builder Exit Fees	2.0% off-ramp	Fiat / Stablecoins

FINANCIAL PROJECTIONS

From $10M to $1B AUM —
EBITDA-positive Year 3. 50% margin Year 5.

	Year 1	Year 2	Year 3	Year 4	Year 5
Total AUM	$10M	$60M	$200M	$500M	$1B
Token Price ($GRES)	$1.00	$1.18	$1.39	$1.71	$2.07
Operating Revenue	$450K	$3.2M	$12M	$33M	$65M
Gross Margin	73.3%	75.0%	78.3%	81.8%	83.4%
EBITDA	**-$920K**	**-$600K**	**$2.7M**	**$13M**	**$32.5M**
EBITDA Margin	**-204%**	**-19%**	**22.5%**	**39.4%**	**50.0%**

COMPETITIVE POSITIONING

Why nothing else fits.

High-return + accessible + global + perpetual. The corner no incumbent occupies.

ALTERNATIVE	STRUCTURAL LIMITATION
Tokenization 1.0 (RealT, Lofty)	Single-asset, no diversification, US-only, no liquidity
Private equity RE (Blackstone PE)	$5M+ minimums, 10-year locks, accredited only
BREIT / private REITs	$2.5K minimum but 8.75% fees, quarterly redemption gates
Whole property purchase	$400K+ tickets, illiquid, 60–120 days to position
Tokenized money-market (BUIDL)	Institutional-only, no RE exposure, KYC gated
GRES	Diversified · NAV-pegged · 40+ markets · Perpetual · Foundation-secured

ROADMAP

Execution, sequenced.

Three phases. Genesis deployed. Blueprint in progress. Ignition at 12–18 months.

01

Genesis

FOUNDATION & COMMUNITY · DEPLOYED

- Smart contracts deployed & verified on Basescan
- BASE L2 + Gnosis Safe multisig treasury
- Whitepaper & Digital Assets Paper published
- Business model defined (NAV, Flywheel, Collateral)
- Visual identity & design system
- Landing page + community (X, LinkedIn, TG)
- Platform backlog (93 stories / 18 epics)

02

Blueprint

PROTOCOL & FIRST ASSETS · IN PROGRESS · 4–8 MONTHS

- Independent smart contract audit (Tier-1 firm)
- Swiss-style Foundation formation
- EU filings (Spain / Luxembourg / Liechtenstein)
- AI Oracle architecture & tech stack
- MiCA-aligned legal structuring
- Builder portal + ADD v1 (48h viability score)
- LOIs & partnerships with EU developers
- Public transparency portal
- Launchpad & institutional outreach

03

Ignition

MAINNET & FLYWHEEL · PHASE 04 · 12–18 MONTHS

- $GRES asset-backed token mainnet
- AI-Augmented Oracle live (real-time NAV)
- First property tokenized (Proof of Deed)
- ERC-3643 native compliance layer
- Buyback mechanism activated (0.5% volume)
- $GRES / USDC liquidity on DEXs
- Public Proof of Reserves (verifiable)
- On-chain governance (holders vote priorities)

TRACTION

Genesis phase — deployed.

Live infrastructure. Open-source contracts. Active build.

LIVE	Smart contracts deployed & verified on Basescan
LIVE	Public landing page + community channels (X, LinkedIn, Telegram)
LIVE	BASE L2 + Gnosis Safe 2-of-3 multisig treasury
LIVE	Whitepaper, Digital Assets Paper, and Communication Charts published

PUBLISHED

- Whitepaper v1.0 — full institutional architecture
- Digital Assets Paper v1.0 — token specification
- Communication Charts — market positioning
- Public roadmap — gres.network/roadmap

NEXT (PHASE 02 — IN PROGRESS)

- Tier-1 smart contract audit (CertiK / Hacken)
- Swiss-style Foundation formation
- Builder portal + Automated Due Diligence v1
- LOIs with first EU real estate developers

TEAM & GOVERNANCE

Solo-founder operated —

built around a network of strategic partners.

FOUNDER

Thiago Sequinel — solo founder.
Currently Director of Operations at Autobiz (Stellantis Group: Peugeot, Jeep, Dodge, Ram, Fiat, Chrysler, Citroën).
linkedin.com/in/thiagosequinel

TRUSTEES (FOUNDATION)

To be appointed in Phase 02.
Independent trustees with legal, RE, and finance backgrounds.
Custody governance separated from operations.

STRATEGIC PARTNERS

Tier-1 audit firm (Phase 02).
Legal counsel — Switzerland, Spain.
EU real estate developers (LOIs).
KYC/AML providers.
Fintech & banking integrations.

Equity in the GRES Operator (for-profit corp) is the vehicle for this round. The Foundation has no equity by design.

THE ASK

Pre-Seed —

$400K to complete Blueprint (4–8 months).

USE OF FUNDS — BLUEPRINT PHASE

- Independent smart contract audit (Tier-1)
- Swiss-style Foundation formation
- EU filings (Spain / Luxembourg / Liechtenstein)
- MiCA-aligned legal structuring
- AI Oracle architecture & tech stack
- Builder portal + ADD v1 (48h viability)
- Senior commercial hire (BD: angels, builders)
- Public transparency portal + LOIs with EU developers

STRUCTURE

- Vehicle: GRES Operator equity
- Instrument: SAFE / SAFT (negotiable)
- Cap table: clean, pre-Seed
- Pro-rata rights for follow-on rounds
- Foundation interest is non-dilutive by design
- Value via NAV growth — no yield distribution
- Path to liquidity: $GRES mainnet (Phase 04)
- Exposure to a global financial primitive

Real estate.
Re-architected.

Built to compound across generations.
